DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8 and 16-20, drawn to an antenna including a ground plane and a cone, classified in class 343, subclass 705.
 - II. Claims 9-15, drawn to a method for increasing the bandwidth of a monocone antenna, classified in class 343, subclass 705.
2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another materially different apparatus. For example, the process of increasing the size of a monocone antenna without increasing the apex base, as claimed in independent claim 9, can be practiced on a number of different antenna apparatus besides the monocone antenna with an 18:1 frequency ratio, as claimed in independent claims 1 and 16.
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
